## Home Water Efficiency Plumber – North East Area

### Description

**Are you a qualified plumber looking for a fresh challenge?**

At Aqualogic we're recruiting plumbers to join an award-winning project focused on sustainability. We deliver free water efficiency visits to households, helping reduce water usage, cut carbon, and save customers money.

**Aqualogic is the UK's leading provider of water efficiency and demand management services.**

We work with many of the country's major water utility companies, as well as a diverse and prestigious cross-sector client base. Our comprehensive range of services covers every aspect of water demand management, delivering tangible benefits for both our clients and their customers.

### Role Overview

You'll visit customers identified as high-water users to assess their plumbing fixtures, install water-saving devices, fix leaks and provide tailored advice to help them reduce water consumption. You'll use our bespoke app to log data and explain your findings to customers in a professional and engaging manner.

### Why Join Us?

- Guaranteed salary plus attractive bonus scheme
- Work on a nationally recognised, environmentally impactful programme
- All appointments scheduled for you—just focus on delivering excellent service
- Company vehicle and equipment provided
- We have a 96% customer satisfaction rating

### Key Responsibilities

- Conduct water efficiency visits in customer homes
- Assess and fit water-saving devices (e.g. taps, showers, toilets)
- Measure flow rates, check for leaks, and take meter readings
- Record data via the bespoke app
- Educate customers on sustainable water use and behavioural changes
- Provide high levels of customer service and feedback on service delivery
- Occasional weekend work required

### Requirements

- City & Guilds Level 2 NVQ in Plumbing (essential)
- Full UK driving license (essential)
- GCSEs in Maths and English
- National Water Hygiene 'Blue Card' (preferred – training provided)

### Hiring organization

Aqualogic (WC) Ltd
