## Maintenance Plumber

### LOOKING FOR A CAREER CHANGE?

Aqualogic are delighted to announce we're recruiting qualified plumbers who perhaps want a career change and are looking to do something different supporting sustainability, with greener values, whilst being rewarding and offering a guaranteed income plus performance bonus.

This role is ideally suited to maintenance plumbers who have an appetite for problem solving and retro fitting rather than first fix or fit out plumbers. Typical environments are commercial building and schools or similar.

Following the successful award of a number of flagship contracts with water companies, we need to recruit plumbers to help us help their commercial customers become water efficient.

You may be recently qualified looking for a new role or someone with many years plumbing experience who wants something different to the norm; either way this is a great role that benefits customers enabling them to cut carbon, save water and money.

### **We know the customers love it because we have a 96% approval rating.**

We plan all of jobs for you, all you have to do is turn up at the customers property and carry out the commercial water efficiency survey, you may then have to fit a range of products that we supply to help the customer save water, ranging from urinal controls to push taps.

All in all, together with our customers we'll be aiming to be carbon zero, help our customers get there and importantly, reduce water use to a sustainable level of 15% less over the next 5 years.

### **Job Summary**

You'll be visiting companies who are keen to save water and money, example include schools, colleges, hotels, office blocks etc.

You'll be able to represent Aqualogic and our water company clients in a confident, professional and knowledgeable manner, while engaging and discussing water use across a range of areas from taps and showers to pools, hot tubs, irrigation and more.

### **Hiring organization**

Aqualogic (WC) Ltd

### **Employment Type**

Full-time

### **Working Hours**

40 hour weeks

### **Salary and Benefits:**

Guaranteed Salary £25k - £30k dependent on experience.

Attractive bonus

Vehicle (van), smart phone, associated equipment

Full Time - 40-hour weeks.

Location: National role, based out of Aqualogic HO, Birkenhead, Merseyside

### **Date posted**

June 13, 2022

You'll be carrying out water efficiency checks within commercial settings, discussing water use and assessing the plumbing fittings, measuring the flow rates and looking for leaks. Where necessary, you'll be fitting products from our comprehensive range of water saving products and taking a meter read.

Through training and workshops, you'll become a water saving expert, dispensing advice, looking for new technologies and most importantly passionate about delivering a worthy and exceptional service.

Plus, you'll be inputting the vital data you've been taking onto our system on your provided IT equipment.

### **Main Duties**

- Visiting commercial properties, liaising with business managers.
- Discussing water efficiency and the drivers behind it.
- Survey and check of existing water fittings.
- Fitting the recommend water saving devices
- Ensuring the highest of customer care standards are met.
- Data inputting
- Deliver the best service in the industry (we have 96% satisfaction rating).
- Feeding back any learnings and improvement
- Occasional weekend work will be required

### **Qualifications**

- City & Guilds Level 2 Plumbing NVQ
- National Water Hygiene 'The Blue Card' preferred although training will be provided
- Educational: GCSEs including Maths and English
- Full UK driving licence: essential (a company vehicle will be provided)
